Life in HONG KONG

Our campuses

The HKU Business School provides a dynamic and conducive environment for learning, teaching and research. Advanced facilities are provided on the three campuses located in the Cyberport, HKU Main Campus and Town Centre at Admiralty.

Cyberport Campus

Located at the flagship of Hong Kong's digital industry - Cyberport. The School's facilities at Cyberport include state-of-the-art classrooms, group meeting rooms and social areas for postgraduate students and learning partners from corporates that collaborate with the School. This is a place where university and business communities can come together and inspire innovations.

HKU Main Campus

The Headquarters of the HKU Business School is located at K.K. Leung Building in the HKU Main Campus. In addition to facilities such as lecture theatres, classrooms, computer laboratories and other areas for academic activities, the campus is also home to many research centres and institutes under the School. The Main Campus also features other learning facilities, resources and services needed in university life.

Town Centre

Located at the heart of the city, Admiralty Town Centre brings the resources of the School to one of the financial districts in Hong Kong. Apart from featuring cutting-edge facilities such as executive classrooms, meeting rooms and comfortable lounges. This downtown campus is a convenient location for hosting events and seminars, and connecting students, alumni and partners from all over the world.

Global presence

HKU Beijing Centre

Located in Asia Financial Centre where Asian Infrastructure Investment Bank is headquartered, HKU Beijing Centre mainly serves as a teaching venue for HKU Business School and provides ample space and state-of-the-art facilities for faculties to develop academic programmes, promote alumni entrepreneurial start-ups, and organise alumni events.

HKU-Tel Aviv Innovation Hub

The HKU-Tel Aviv Innovation Hub combines the academic excellence of HKU and the innovative, entrepreneurial energy of Israel. The Hub will foster deep engagements between the academic, business and technology communities of Israel, Hong Kong, and the Greater Bay Area, promoting cross-border collaborations and partnerships.

Shenzhen Campus

Located at the heart of Futian District in Shenzhen, the Shenzhen Campus is the School's latest development to promote knowledge exchange, technology transfer and talent collaboration in the Greater Bay Area and Mainland China.

The Representative Office of The University of Hong Kong in Vietnam

HKU in Vietnam signifies the importance of Vietnam as a growing economy, her youth, talent, and key location. We strengthen connections with Vietnam by providing market-oriented research, superior learning experience, and instrumental resources.

HKU iCube

HKU iCube is in the prestigious Two Exchange Square featuring a magnificent harbour view. It serves as a place to facilitate knowledge exchange for HKUBS associates, as well as a bridge to connect business leaders in and outside the school.

Modular Calendar

Courses are offered on a modular basis to allow students to focus on 1-3 courses at a time. Normally, each module consists of six to eight weeks including the examination week.

For reference only, actual duration can vary.

* Courses for MCGRM are offered on a semester basis.

** Module dates for MFWM programme are slightly different.

***Mini-Module (non-compulsory) for International Field Trips, Professional Development Programmes and Independent Study Projects, no class to be arranged.

Master of Climate Governance and Risk Management Overview

Empowering youth leaders: Driving climate action

The Master of Climate Governance and Risk Management programme offered by the HKU Business School and Institute for Climate and Carbon Neutrality (ICCN) is a unique programme that integrates business acumen with a deep understanding of climate science and policy. Its aim is to equip graduates with the interdisciplinary expertise necessary to address climate change and achieve carbon neutrality through a combination of scientific, policy, and business knowledge. The

programme is guided by the mission of the University of Hong Kong and is aligned with the objectives of ICCN, as well as the increasing global focus on promoting leadership and initiatives to combat climate change. Its curriculum is carefully structured to provide comprehensive global perspectives on climate governance and management issues, recognising these issues as some of the most significant challenges of our time.

Interdisciplinary Academic Focus

HKU Business School

The Institute for Climate and Carbon Neutrality (ICCN)

Partnerships:

Faculty of Science

Faculty of Architecture

Faculty of Social Sciences

Faculty of Law

Faculty of Engineering

School of Public Health

5 Top Q&A PROGRAMME DIRECTOR

Top 5 questions about the Master of Climate Governance and Risk Management programme, answered by our Programme Director

Prof. Fan Dai.

1 Why is it important for today's businesses to understand climate governance and risk management?

Global climate change impacts a wide range of areas, including geopolitics and economies. It is crucial for individuals and organisations to have a thorough understanding of and dedication to global and corporate citizenship, as well as governance structures that uphold integrity and efficiency. Managing climate change is particularly significant for global companies, as it assists in mitigating risks, meeting stakeholder demands, adhering to regulations, and fulfilling ethical obligations.

2 The master's programme is interdisciplinary. What other faculties are involved?

The interdisciplinary academic focus of the programme is reflected in its partnership with the HKU Business School and ICCN, as well as the Faculties of Science, Social Science, Engineering, Architecture, Law and School of Public Health. Each of these departments shares the collective goal of applying climate change and environmental-related research to real-world situations in their respective programmes.

A series of specialised core courses establish a strong scientific foundation for inquiry. These courses cover topics such as the science of climate change, the relationship between the financial market and climate change, environmental economics, data science and models, and climate policy. Elective courses allow students to customise the programme based on their interests, including options such as carbon accounting and ESG, climate data and remote sensing, public health and climate impact, climate change law, sustainable urban planning, and green building.

3 What skills will I develop while studying this programme?

Our programme anticipates that our graduates will be able to effectively oversee various sectors in order to adapt to the fluctuating climate in the economy, society, and environment. Throughout the programme, students will learn about the hurdles and advantages posed by climate change for the government, non-governmental organisations and private businesses, spanning various fields such as basic science, policy development and law, strategic planning, business operations and marketing, accounting, and finance. change for the government, non-governmental organisations and private businesses, spanning various fields such as basic science, policy development and law, strategic planning, business operations and marketing, accounting, and finance.

Students will also gain the necessary analytical abilities for creating and managing data sets and will take part in a unique project in which they will act as consultants for their organisations. This experience will deepen their understanding of the limitations that organisations within the climate and society space face, while also honing their ability to develop climate solutions and investment strategies.

4 What type of student is suited to the MCGRM programme?

The course is tailored to students with a strong interest in tackling global climate change through scientific comprehension and efficient control. It is particularly suitable for those who are keen on exploring the interconnectedness of science, policies, and technologies with regard to climate change, as well as implementing these solutions at various levels, locally, nationally, and globally.

5 What research opportunities are there for graduate students?

Students who are interested in pursuing a climate-related Ph.D. can choose from various research areas. Climate Sciences involves the examination of the Earth's climate system, while the Impacts of Climate Change on Ecosystems and People focuses on the effects on biodiversity, ecosystem services, and human livelihoods. Technologies and Policies for Climate Change Mitigation and Adaptation focus on developing strategies and evaluating renewable energy, carbon capture, and policy frameworks.

Opting to pursue a Ph.D. in these areas provides students with the opportunity to address the urgent challenges of climate change through the expansion of knowledge, innovative solutions, and well-informed policy decisions.

*** Outstanding students will only be awarded either the Entrance Scholarship or the Dean's Master Fellowship. The scholarship and fellowship will not be issued to the same candidate.

Scholarship

Entrance Scholarship

We offer scholarships to qualified students, who may receive a scholarship up to 100% of the tuition fees, on the basis of student's academic merit at the time of admission. All eligible candidates are automatically considered; no separate application is required.

Merit-Based Scholarship

We offer scholarships to qualified students, who may receive a scholarship up to 10% of the tuition fees, on the basis of student's academic performance in the duration of studies, participation in the extra-curricular activities, recommendation from course instructor, and level of support provided to the programme office. All eligible candidates are automatically considered; no separate application is required.

Fargo Wealth Excellence Scholarship

Up to 14 scholarships shall be awarded, starting from the academic year 2022-2023, to Year One students, available to all masters programmes offered by the HKU Business School on the bases of academic performance in the respective programmes and their contributions to the community of masters programmes. The Scholarship shall be of the value of HK\$10,000 each.

Tuition Fee
\$360,000*

A deposit of HK\$120,000* is required to confirm the admission offer. The balance shall be payable in two instalments in one year, irrespective of the number of courses taken in each module.

* Subject to change and final approval of the University.

HKU Business School Dean's Master Fellowship

The Fellowship shall be awarded to new full-time students admitted to any one of the taught postgraduate programmes offered by the Faculty of Business and Economics based on the following criteria: a. Academic performance; b. Relevance of work experience, if applicable; and, c. Interview performance, if applicable. The value of each fellowship shall range from HK\$250,000 to the full prevailing composition fee. All eligible candidates*** are automatically considered; no separate application is required.

Course Exemption

Up to two required courses, except the capstone course, may be granted (normally by examination) if candidates

A

can produce evidence, such as transcript and course syllabus, that a course is equivalent in content to another course taken elsewhere for which a satisfactory grade has been obtained; or

B

are holding relevant professional qualifications which were obtained before admission to the curriculum.

No credits will be given for the exempted course and candidates shall be required to take an approved alternative course of the same credit value.

Research Opportunities for Graduates Students

The Science of Climate Change

Understanding the processes underpinning our planet's climate is fundamental to predicting future change.

Technologies and Policies for Mitigation and Adaptation

Focus on developing strategies and evaluating renewable energy, carbon capture, and policy frameworks.

Climate Impacts on Ecosystems and People

Focus on the effects on biodiversity, ecosystem services, and human livelihood.

Advanced Standing

Advanced standing of up to two required courses, except the capstone course, may be granted if

A

the course is completed at a graduate, postgraduate or master level from a recognised curriculum elsewhere within the last four years before admission to the Master of Climate Governance and Risk Management curriculum and achieved a good grade in the course; or

B

the candidate possesses a relevant professional qualification which was obtained before admission to the curriculum.
